Children of Prep-C set up food stall in which school invited parents.

Parents were very enthusiastic and reached school before time.

One could easily see their excitement.

They were waiting outside the meeting hall.

The parents were made to sit in their designated place for the event. There were 4 tables with the small chairs in the hall for children which had their own names like **Red Table**, **Yellow Table**, **Blue Table**, **Green Table**.

Whatever the food stall needed was well kept on the tables.

There was also a board which clearly mentioned the details of the activity, names of ingredients and their nutritional value, cooking process, etc.

Children entered the hall with their class teacher **Mussarat Begum**.

Light music was playing in the background and the children were made to stand in front of the board.

Food stall started with an energizer song - "Let's all play the kitchen band..."

Mussarat ma'am talked about the food stall and asked **Sumera** to speak about golden rules of cooking, after her **Avaneesh & Avyukt** spoke about the food of the day which was the, 'Bread Canape'. Its cooking process was explained by **Paridhi**.

Children sorted colour coded picture cards of the ingredients and matched it with 5 components of 'My plate'.

Children were asked various questions related to the food they were about to prepare that day.

Theme talk ended with the song - **Are you eating healthy food**

Photo Gallery

Children washed their hands and were seated in their designated place with the teacher on each table for the supervision. Children were made to cut the cucumber in 4 parts.

All this was happening under the supervision of their teacher, so that they don't hurt themselves. They mixed **Cheese Spread, Paneer and Mixed Herbs** in it.

Bread was cut into 4 halves emphasizing the concept of fractions. They were asked to spread butter on the slices and then assemble the cucumber mixture on it.

They finished by placing a cherry tomato on each slice.

Bread slices were looking very delicious.

The serving was done on a ten frame mat integrating numeracy concept like **5 and 5 makes 10, 10 and 10 makes 20.**

Two children were made to sit at a coupon counter for distributing the coupons to the parents. The Bread Canape was served to parents by the children, everybody appreciated the effort of the children.

The leftover food was given to the animals. **'Ladli the Goat'** and her kid enjoyed it very much.

As a parent I appreciate this invitation of the teacher a lot.

We were very happy to see our kids doing something new. I am sure it was very proud moment for every parent. I would also like to thank the teachers for putting in efforts, and congratulate the whole staff on the grand success of this food stall.

Looking forward to attend such more events.

Warm Regards.
Sarabjit Kaur,
M/o Manraj Singh. Prep-C
