Activity 4

- Take your child for a nature walk and allow him/her to observe the adopted tree for a few days.
- Let the child spend time observing changes in the tree during the winter season, e.g. colour and shape of the leaves etc.
- Ask the child to draw his/her observations in the space given below.
- After the child has made the drawing ask the child to share her/his observations about the tree. You are requested to write the child's verbal responses on this sheet after the child finishes illustrating.
- You are requested to preserve these sheets with the ones that have been done earlier for this activity in order to compile them later.

Bonding with the Mango tree
Activity 4 - Changes in the tree during winter season

During winter season I observed that leaves were there on the mango tree but few leaves were dry and brown in colour because of cold winds.

There was no flower, no fruit on the mango tree. Dry and green leaves were all around the tree. Also, I did not see any insect around the tree.
